

# NORTH FORK VETERINARY CLINIC

## PUPPY CARE PROGRAM

The first six months of your puppy's life can be very enjoyable provided he or she stays happy and healthy. Your puppy can be subjected to a number of problems during this critical phase, most of which can be prevented. This program will cover exam/office call charges, as well as vaccines and treatments listed below during this six month period. This program does not cover extras such as: surgery, x-rays, medications and after hour calls.

- 8 weeks            Comprehensive physical exam & 1<sup>st</sup> DHLPP (distemper hepatitis, leptospirosis, parainfluenza and parvo-virus). Deworm for intestinal parasites. Recommendations on heartworm prevention, including complimentary first dose of Heartgard. Puppy behavior problems, flea and tick prevention and diet recommendations will also be discussed. Your puppy will also receive a complete health record and weight check.
- 12 weeks           Brief exam, 2<sup>nd</sup> DHLPP, weight check and fecal exam. Please bring a fresh stool sample. Continue heartworm preventative.
- 16 weeks           Brief exam, 3<sup>rd</sup> DHLPP, rabies vaccine and weight check. Recommendations on spaying or neutering and basic puppy health care.

## PUPPY PROGRAM

Total Value: \$400.00            Your Cost: \$264.00

You may add a series of bordetella (kennel cough) or lyme vaccines to this package for an additional fee. Recommendations will be based on prevalence and exposure risk to your pet.

Prevention is the best medicine. This program is provided to keep your puppy healthy at an age where disease and parasites can be a real burden to his or her health. Please feel free to call us anytime with your questions.
